Monthly Commentary

During June, the Company continued to produce both strong revenue and capital returns. The strong capital returns had two major drivers as outlined below:

- Elevate's stock price (NYSE: ELVT) continues to appreciate as the management team executes on its strategic plan; and
- An upcoming Series B investment at a higher value than the previous round by a leading technology investor into one of the platforms held by the Company.

During the month, the Company also increased its first out participations from a US bank on both the Company's Avant and Elevate balance sheet investments, slightly increasing the look-through gearing ratio and giving the Company proceeds of \$7.2 million, which were subsequently reinvested into other balance sheet investments. The look-through gearing ratio increased slightly to 0.15x as at 30 June 2018 from 0.14x as at 31 May 2018.

During June, the Company did not repurchase any shares under the share buyback program.

Events Subsequent to 30 June 2018

On 2 July 2018, the Company was fully repaid on its balance sheet investment to Wheels Financial Group, LLC, which comprised 5.11% of the Company's NAV as at 30 June 2018. The early repayment of this investment came with a prepayment penalty fee of \$220 thousand (0.05% of NAV) which was recognised by the Company in June. The Company has redeployed substantially all the proceeds from the investment into new and existing balance sheet investments.

From 1 July 2018 through 27 July 2018, the Company did not repurchase any shares under the share buyback programme. The Company continues to be nearly fully invested.

The Company is authorised and regulated by the Financial Conduct Authority and is registered in England (registered number 9385218) with its registered office at 6th Floor, 65 Gresham Street, London, EC2V 7NQ, United Kingdom.

The Company’s Investment Objective

Increased banking regulation (particularly in Europe and the U.S.) is imposing restrictions on certain types of lending by banks to both consumers and small businesses, leading to a growing market for specialty lending Portfolio Companies. The online lending market continues to expand rapidly as both borrowers and investors recognise the advantages relative to the traditional bank lending model.

The Company seeks to generate an attractive total return for shareholders consisting of dividend income and capital growth via investments across a diverse portfolio of various online lending providers, asset classes, geographies (primarily U.S., U.K., Europe and Australia) and credit bands.

The Company generates investment income from exposure to Portfolio Company-originated consumer and small business loans, including corporate and trade receivables, in accordance with certain investment limits and restrictions to ensure diversification of the Company’s portfolio is maintained and that concentration risk and credit exposure is mitigated. In addition, the Company may also make direct equity investments, or receive warrants to purchase equity stakes, in such Portfolio Companies.
