Monthly Commentary

The Company continues to see strong underlying performance across the balance sheet investment portfolio. All interest earned in September was received as scheduled during the month of October. The Company maintained an average cash balance of approximately 9% of NAV during the month and continued accruing the incentive fee, both of which impacted the net revenue return.

The Company's capital return of 1.79% for September represented a record monthly return. The return was driven by an increase in the valuation of the Company's investment in weFox as well as unrealised gains in several other portfolio companies.

The Company repurchased 1,547,589 ordinary shares during the month at an average price of 64.02 pence per share and an average discount to NAV of 28.02%⁴.
